

## A State-of-the-Art Investment in Big Sky's Water Future

Big Sky's investment in water infrastructure isn't new — irrigation piping installed more than thirty years ago laid the groundwork for the systems now unlocking new opportunities to reuse water, strengthen resilience, and protect the rivers we all depend on.

### Pilot Snowmaking

Operational in 2024

Piloted and launched innovative snowmaking, now operational to boost resilience.

### Committing to a \$60M Plant

2020 Commitment to Lead the Way in Treatment & Reuse

Secured funding — through a 1% infrastructure ballot initiative — for a new water treatment plant to improve water treatment and expand reuse options and opportunities. Heavy front-end investment was needed to implement Big Sky's vision for holistic water solutions.

### Reuse Infrastructure

Expanding piping for irrigation reuse

Big Sky has built and expanded systems that store, move, and reuse treated water across the community.
